

COLOUR SPRAY BLACK

High-temperature colour spray

Description

The special high-heat resistant MOTOREX COLOUR SPRAY forms a hard and durable surface which does not burn off, flake or chip. Very good direct adhesion with high rust protection effect and weather resistance.

Notes

- Spray distance 25-30 cm
- Spray on in a cross pattern

Application

MOTOREX COLOUR SPRAY is applied in one to two thin coats without priming. Excessively thick coats have a negative effect on the heat resistance. To achieve good heat resistance and to counteract strong odour nuisance, the objects to be painted should be slightly warmed up beforehand.

Before use, shake the can until the balls move audibly for about 20 seconds. Also shake well in between spraying.

Container
